

2022 Lindsay Orange Blossom Festival
Queen
Madison Caesar

Madison Caesar was born in Woodstock, Illinois and moved to Lindsay when she was in 8th Grade. Her parents, John and Kristy Caesar, moved the family here to help realize the promise of Lindsay's education reform known as the (PBS) Performance Based System. Her brother Leif is a graduate of UCLA and currently a graduate student, studying sports management at UNLV. Sister, McKaylie is studying early childhood education at Cal State Fullerton, a member of the Track and Cross Country Program, and a 2019 Orange Blossom Festival Attendant.

Madison's core values are built around commitment, excellence and accountability which she credits for helping her achieve class Valedictorian, Cardinal of the Year, 15 Varsity Letters and 7 CIF Valley Appearances while in high school including one championship. These accomplishments paved a path to become a Smittcamp Family Honors College Scholarship recipient and ultimately graduating Magna Cum Laude from California State University, Fresno with a Degree in Civil Engineering and a Minor in Construction Management.

Today, Madison is employed by 4Creeks Engineering in Visalia, California in the Agricultural department where she is responsible for dairy facility permitting and design across the San Joaquin Valley.

Learning the art of leadership is something that does not come easily to Madison but she challenges herself to become well rounded. In high school she coached for the Lindsay Skimmers swim team & summer basketball, was the Senior Class President, as well as an officer of many clubs. In college, Madison took a risk by campaigning and eventually becoming a school wide senator as well as the president of the Lyles College of Engineering Officers Council. She also tried to make the most of her college experience by becoming extremely involved. She joined numerous clubs and extracurriculars such as the Kappa Alpha Theta Sorority, Reedley College Golf Team, Society of Women Engineers, American Society of Civil Engineers, Engineering Honors Societies and the Well Young Adults College Group.

Madison lives by the ideal of appreciation and believes it is important to give back to those who have given to her and/or others that may not have had the same opportunities as she has had. In college she continued her volunteer efforts post high school by volunteering in Education Galas, Valley Children's Adaptive Sports Fundraisers and Evening to Treasure Special Needs Proms. Most recently, Madison serves as an advisor on the Lindsay High School Engineering Pathway with a passion to encourage more females to enter the STEM career fields. As well, she is currently involved in The Neighborhood Degree Project as a mentor where she helps disadvantaged youth discover their career goals, apply for degree programs and financial aid, and mentor them through their chosen degree program until they graduate.

Madison is excited to be part of the Orange Blossom Festival for the opportunity to learn Lindsay's history and celebrate the community that has supported her for the past decade. "I am truly blessed and humbled that my hometown would trust me with such an honor. To all the people that keep these traditions alive and make our little town tick, thank you for all you do!"
